The weather may remain partially cloudy to clear for next five days with chances of light rainfall on 23rd & 27th June. Maximum temperature may range from 38°C to 41°C which is above normal by 1°C. While minimum temperature may range from 26°C to 28°C which is above normal by 2°C. Winds may blow in North North East direction with the speed of 1km/hr. The morning relative humidity may range from 40%-60% and evening relative humidity may range from 30%-40% during this period.

WEATHER FORECAST BASED AGROMET ADVISORIES W.E.F. 23rd to 27th June, 2018

Crop	Stage	Weather based Agro- advisories
Maize	Sowing	Start sowing the recommended var. of maize (Vivek-25, Vivek QOM-9 HM-5 and HQPM-1) with seed rate of 20-30 kg/ha as soil reaches vattar condition. Treat the seed with Bavistin @ 3g/Kg of seed before sowing.
Paddy	Nursery raising	Farmer may go for transplanting of rice seedling. Transplant 2-3 healthy seedlings per hill free from pests and diseases. Keep the rice nursery and bund free from weeds either by hand weeding or by application of butachlor weedicide@30 kg/ha.
Green Manuring	Vegetative	To enhance the biomass apply urea 2kg /kanal to dhaincha crop after receipt of rainfall. Incorporation of dhaincha may be taken up before flowering stage in the transplanted rice field.
Summer Fodder	Vegetative	Start sowing of fodder crops such as Jowar mixed with cowpea.
Floriculture: Rainy annuals	Nursery raising/ transplanting	Transplanting of rainy seasonal annuals (gaillardia, balsam, cosmos, portulaca, kochia, sunflower, morning glory, gomphrena, celosia etc.) may be done as sufficient moisture is available.
Vegetables:		.
Tomato	Flowering/ fruiting	Install pheromone traps @ 2/kanal along with spray of neem oil @ 3ml/lt during clear weather to control fruit borer during clear weather.
Mushroom Milky mushroom		Due to increase in morning and evening relative humidity in the atmosphere, farmers can go for early spawning of mushroom Heap wheat straw in store for the upcoming season for normal and late mushroom spawning.
Horticulture		Young plants should be protected from intense heat by providing thatching. Trunks of grown up plants should be painted with lime solution. Provide grass mulch on plant basin to minimize evaporation. Irrigate the plants at 2-3 days interval.
Fisheries (Carp Farming)	advanced fingerlings /yearlings	Farmers can go for stocking the seed of common carp fish, which is presently available at the department of Fisheries, J&K Govt.
