Weather summary of previous 5 days (13 th to 17 th July, 2017)	Range of Max. Temperature (°C)	25.6-30.6				
	Range of Min. Temperature (°C)	21.0-22.9				
	Range of Relative Humidity (%)	73-96				
	Rainfall (mm)	27.1				
Ensembled forecast for next 5 days (0830 hrs, 19 th to 23 rd July, 2017)	Date	19/07/17	20/07/17	21/07/17	22/07/17	23/07/17
	Rainfall (mm)	5	5	0	15	5
	Max. temperature (°C)	25	25	27	25	25
	Min. temperature (°C)	22	22	22	21	21
	Total cloud cover (Okta)	7	7	7	7	7
	RH Max (%)	80	80	80	90	90
	RH Min (%)	70	70	70	80	80
	Wind speed (km/hr.)	1	1	1	1	1
	Wind direction (degrees)	65	105	95	75	65

WEATHER FORECAST BASED AGROMET ADVISORIES W.E.F 19th to 23rd July, 2017

Crop	Stage	Weather based Agro- advisories
Maize	Germination/ Sowing	Due to chances of rain for next 5 days, make arrangement to drain out excess water from the fields wherever crop is there. Donot allow water to stagnate in fields.
Paddy	Transplanting	Due to chances of rainfall, farmers are advised to bund their fields for in situ storage of rain water and utilize the same for puddling. Make necessary arrangement to drain out excess water from transplanted fields. Postpone transplanting till weather gets clear.
Kharif Pulses (moong/mash)	Sowing /germination	Postpone the sowing of <i>kharif</i> moong and mash till weather gets clear. Drain out excess water from the fields.
Vegetables:	Flowering/ fruiting	Do not allow rain water to stand in the fields. Postpone plant protection measures as well as application of fertilizers. Avoid direct contact of cucurbits fruit with soil.
Floriculture: Rainy annuals/ Chrysanthemum		Make arrangement to drain out excess water from the fields. Postpone plant protection measures.
Horticulture Mango	Young/Bearing	Postpone plant protection measures till weather gets clear. Make arrangements to drain out excess rain water from the orchards.
Mushroom Milky mushroom		Due to increase in morning and evening relative humidity in the atmosphere, farmers can go for early spawning of mushroom Heap wheat straw in store for the upcoming season for normal and late mushroom spawning.
Sericulture Mulberry	Tree plantation	Mulberry saplings can be transplanted during this period. Apical cut must be given at a height of 175-180 cm.
Cocoon crop	Harvested cocoons	Cocoons harvested during April month should be loosely packed in muslin cloth bags. The bags should be kept in wire mesh covered racks to avoid rodent attack till sale of the crop.
Apiculture		To control mite, dust sulphur on top bars @ 1g/frame /oxalic acid treatment @ 3.5% / litre water.
Fisheries Culture fisheries	Yearlings/ Fingerlings/fry	Farmers should check the outlet and water level of the pond in order to avoid the escape out of fish live-stock from ponds. Apply screen to the outlet.
Capture fisheries		Fishermen should be careful while netting operations in the wild,
