

## **DIVISION OF VETERINARY SURGERY AND RADIOLOGY**

### **FARMER INFORMATION**

The division provides specialized expert services to the **Farmers** through Teaching Veterinary Clinical Complex of the University on all working days and holidays including emergencies. Services are provided in diagnosis and treatment of all surgical affections of domestic animals and pets.

Specialized diagnostic facilities like plain and contrast radiography, ultrasonography and laparoscopy are used to aid diagnosis.

Specialized surgical treatment is provided in orthopaedics, ophthalmology, gastrointestinal tract and Urogenital tract diseases.

Expert services are also provided to the farmers through clinical cum awareness camps organized by various agencies from time to time.

Farmers are educated in the Teaching Veterinary Clinical Complex as well as in the clinical camps regarding prevention and first aid of surgical affections of animals.
