

- Awareness is raised among local farmers about various aspects of male and female reproduction, and effect of environment on animal's performance and manipulation of such factors to augment their production.
- Scientists of the division are reaching out to the farmers under "Mera Gaon Mera Gourav" programme and providing advisory service about different metabolic disease conditions of animals. Under the programme, scientists are also acting as a bridge between farmers and officers/ scientists of Govt./ SKUAST –J to bring overall socio-economic development of the adopted villages.
- Division is carrying out the haematological and biochemical tests of blood, milk and urine of animals to facilitate the diagnosis of diseases.
- Division wholeheartedly cooperating and participating in 'Kisan Melas' organized by Directorate of Extension, SKUAST- J and other Govt. Agencies.
